

1 APR - Perl Interface for libapr and libaprutil Libraries

1.1 Synopsis

```
use APR;
```

1.2 Description

Notes on how to use APR outside mod_perl 2.0.

Normally you don't need to use this module. However if you are using an `APR::` package outside of mod_perl, you need to load APR first. For example:

```
% perl -MApache2 -MAPR -MAPR::UUID -le 'print APR::UUID->new->format'
```

1.3 See Also

mod_perl 2.0 documentation.

1.4 Copyright

mod_perl 2.0 and its core modules are copyrighted under The Apache Software License, Version 1.1.

1.5 Authors

The mod_perl development team and numerous contributors.
